

Wednesday 26th November

John Lightfoot Co-founder of the Shropshire Barn Owl Group

Before the group was formed the Barn Owl in Shropshire was in decline and not just in Shropshire so consequently the barn owl was put on the RSPB amber list of species of medium concern. That is when the group was formed to try and stop any further decline. One of the main reasons was a lack of nest sites. So we started to install nest boxes around the county. In our 23 years we have installed 542. Do come along and see if we have made a difference.
